Summary:

- Production northern regions tracking low YTD due to decrease in GF production and later Navel, Soft Citrus and Valencia production. As a result of less conventional shipping to Japan, China and EU, higher demand for reefer containers in Durban inevitable. Very high stock levels at some cold store facilities in Durban, exporters urged to increase shipping to prevent major blockage in the port.
- Production E Cape regions started later but now tracking with higher production output evident for weeks 20-22 increasing expected to peak to week 28. High fruit flow to ports now imminent and container exports from NCT/PECT very evident. The disparity between production output and export volume raises some alarm bells for this region.
- Production W Cape & Northern Cape regions tracking per 2022 estimates. Export focus to NWC/UK & North America.
- An appeal for Container Lines to ensure sufficient empty equipment aligned to ports per the 2022 estimates. I.e. E Cape region.
- **CHANGES TO THE FCM RISK MANAGEMENT SYSTEM (FMS) REQUIRED TO COMPLY WITH NEW EU FCM REGULATIONS NOW AVAILABLE.** Next weeks (6 July) Log update meeting will focus on this new measure. Invitation will follow.
