

### Note from the Managing Director

The 2024/25 season is now upon us and all the preparations and planning over the last few months is now kicking into gear. SIT moths will be now be released for the first time this season and the Addo facility is busy making sure we have enough stock in the right places to make sure our growers have easy access to our quality products. I wish the whole RBX team a fantastic season where we will once again show the value of a strong and dedicated team that supports the export fruit industry.

## RBX shining at the 12<sup>th</sup> CRI Symposium

From August 18-21, our team had the pleasure of supporting and participating in the 12th Citrus Research International (CRI) Citrus Symposium. As a proud Ruby sponsor, we were thrilled to be part of this event, which brought together industry stakeholders and growers for a week of insightful presentations, discussions and networking.

One of the RBX highlights was the River Bioscience-sponsored Happy Hour on Monday, where attendees enjoyed our famous branded drinks. Our team also had a big presence at the golf day at the Champagne Sports Resort, where we provided refreshing beverages to players during a long sunny day. Our exhibition stand was also a winner – where we showcased all our RB products and XSIT's services that contribute to sustainable farming.

It was an incredible week of valuable interactions, and we're already looking forward to the next symposium!
