December 2024/January 2025

Keeping all RBX Group Stakeholders Informed

Note from the Managing Director

2024 has just seemed to fly past. Each season brings its own set of challenges for our growers, and our role is to support them in managing these issues sustainably, so we need to stay alert and agile. Adding to this, the ongoing geopolitical pressures worldwide have made for, and will likely continue to create a demanding and unpredictable journey.

With a pleasing number of SIT hectares signed up and volumes for key River Bioscience products looking good we are forecasting a solid performance over the next few weeks which is our main sales window for the whole year. Getting the above delivered to a high standard in the first two months of next year then allows us to put the focus onto our sustainability and development projects to build on our base for the future.

The RBX board recently approved the groups five year plans and I want to acknowledge the huge effort that all the Executive Committee members put in to compile a scenario that clearly shows the opportunities and challenges that we will face over the next few years. The strategic themes established in these plans will guide the more focused projects, that we all will be involved in delivering, to strive for long-term success.

This season delivery does however mean that for many of our team members this is the busiest time of the year, but we must remember to take a break when we can and recharge through some quality time with family and friends.

Wishing all our team a Merry Christmas and a Happy New Year!

CHEERS, ROB
